Crop Responses and Adaptations to Temperature Stress: New Insights and Approaches

Crop Responses and Adaptations to Temperature Stress: New Insights and Approaches

Examine the ways in which various plants respond when exposed to high and low temperatures! The growing demand for food makes breeding for high-yielding crops with built-in resistance against environmental constraints one of the most important challenges for plant breeders today. *Crop Responses and Adaptations to Temperature Stress* investigates the adaptive mechanisms plants have evolved in response to unfavorable temperature conditions. It describes gene transfer technology and other tolerance improvement techniques that aid in developing stress-tolerant plants. Adverse environmental stress conditions, such as extreme temperatures, affect the productivity of important world food crops by inhibiting plant growth and development. *Crop Responses and Adaptations to Temperature Stress* provides valuable information on the mechanisms of stress tolerance in plants that encourage growth and enhance yield performance. Agriculture professionals, researchers, and plant breeders will benefit from the ideas shared on such topics as:

- mechanisms of chilling injury and tolerance
- injury and acclimation of root system functions during chilling temperatures
- mechanisms of cold acclimation
- signal transduction under low-temperature stress
- mechanisms of thermotolerance in crops
- control of the heat shock response in crop plants
- the effects of heat stress on cereal yield and quality

In addition to a detailed review of current knowledge on the molecular biology of plant responses to temperature stress and an introduction to biotechnological advances in improving crop tolerance, *Crop Responses and Adaptations to Temperature Stress* suggests avenues for further study and speculates on the implications of such work for the future of food production.

From reader reviews:

Karen Olden:

Now a day those who Living in the era wherever everything reachable by connect to the internet and the resources inside can be true or not require people to be aware of each info they get. How individuals to be smart in getting any information nowadays? Of course the solution is reading a book. Looking at a book can help people out of this uncertainty Information especially this Crop Responses and Adaptations to Temperature Stress: New Insights and Approaches book as this book offers you rich info and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it as you know.

Karen Martinez:

Reading a reserve tends to be new life style within this era globalization. With studying you can get a lot of information that could give you benefit in your life. Using book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their very own reader with their story or maybe their experience. Not only situation that share in the guides. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors these days always try to improve their proficiency in writing, they also doing some investigation before they write to their book. One of them is this Crop Responses and Adaptations to Temperature Stress: New Insights and Approaches.

Myrtle Galloway:

As a pupil exactly feel bored to help reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just very little students that has reading's soul or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Crop Responses and Adaptations to Temperature Stress: New Insights and Approaches can make you sense more interested to read.

Amanda Stone:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is prepared or printed or highlighted from each source this filled update of news. Within this modern era like right now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just seeking the Crop Responses and Adaptations to Temperature Stress: New Insights and Approaches when you needed it?
