The Specificity of Serological Reactions (Dover Books on Biology)

Karl Landsteiner

The Specificity of Serological Reactions (Dover Books on Biology) Karl Landsteiner

Since the discovery that each particular antibody in the blood tends to react primarily with one specific antigen among the hundreds that can be introduced into the system, great strides have been made toward the elimination of disease through immunization. The late Dr. Karl Landsteiner, winner of the Nobel Prize in 1930 for the discovery of human blood groups, devoted his life to fundamental research and played a guiding role in the development of several important branches of immunology. This authoritative study is an account of the experiments he and his colleagues carried out on antigens and serological reactions with simple compounds.

Beginning with a general discussion of the phenomena of serological specificity, with the emphasis chiefly on the chemical aspects of those reactions that involve immunization, Dr. Landsteiner goes on to cover the topics of natural antigens and antibodies, artificial conjugated antigens, and the reactivity of simple chemical compounds, the chemistry of specific non-protein cell substances, and the developments in our knowledge of serological reactions from a physico-chemical approach. Included in the discussion are his original and fundamental studies in hypersensitivity to chemical allergens and his work with "haptens," on which modern immunochemistry has leaned very heavily. The final chapter, written by Dr. Linus Pauling, carefully presents the principles of molecular structure and intermolecular forces.

An extremely valuable feature of this book is the massive bibliography compiled by the author — over 2,100 items are listed at the chapter ends. A further aid to study and research is the definitive bibliography of Dr. Landsteiner's own writings, new to this edition, and reprinted through the courtesy of the *Journal of Immunology*.

The beginner and advanced student alike will find nowhere else the breadth of coverage given here to basic concepts of immunology. Comprehensive enough for the use of the worker in the field, the book also provides, primarily in an introductory section, explanations and definitions of elementary terminology, concepts, and phenomena of serology for those unacquainted with the subject.

From reader reviews:

Clifford Ranger:

Book is to be different for each grade. Book for children until finally adult are different content. As you may know that book is very important normally. The book The Specificity of Serological Reactions (Dover Books on Biology) had been making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The publication The Specificity of Serological Reactions (Dover Books on Biology) is not only giving you far more new information but also for being your friend when you sense bored. You can spend your spend time to read your e-book. Try to make relationship together with the book The Specificity of Serological Reactions (Dover Books on Biology). You never sense lose out for everything should you read some books.

Laurence Asher:

Reading a reserve tends to be new life style with this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Along with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or maybe their experience. Not only situation that share in the publications. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors nowadays always try to improve their talent in writing, they also doing some investigation before they write with their book. One of them is this The Specificity of Serological Reactions (Dover Books on Biology).

Brittany Schafer:

The particular book The Specificity of Serological Reactions (Dover Books on Biology) has a lot of information on it. So when you read this book you can get a lot of profit. The book was authored by the very famous author. The writer makes some research previous to write this book. This kind of book very easy to read you can find the point easily after perusing this book.

Jennifer Evans:

A lot of people said that they feel weary when they reading a e-book. They are directly felt it when they get a half parts of the book. You can choose typically the book The Specificity of Serological Reactions (Dover Books on Biology) to make your reading is interesting. Your own skill of reading skill is developing when you such as reading. Try to choose simple book to make you enjoy to read it and mingle the sensation about book and examining especially. It is to be very first opinion for you to like to start a book and study it. Beside that the publication The Specificity of Serological Reactions (Dover Books on Biology) can to be a newly purchased friend when you're feel alone and confuse with the information must you're doing of the time.
