## **An Introduction to Medicinal Chemistry** Graham L. Patrick

*An Introduction to Medicinal Chemistry* is the leading text for university courses on this subject. Renowned for being a textbook loved equally by both students and lecturers, it presents complete coverage in an accessible and engaging style.

The text begins with the essential biochemistry on which an understanding of medicinal chemistry is built, introducing the structure and function of important drug targets. It then explores how drugs interact with the body and the consequences of those reactions. There is a section on general principles and strategies involved in discovering and designing new drugs, and another on useful 'tools of the trade'. The text ends with a contemporary look at specific topics within medicinal chemistry, for example, antiviral and anticancer agents; cholinergics and anticholinesterases; and antiulcer agents.

Learning features throughout *An Introduction to Medicinal Chemistry* help to unlock this fascinating subject. A glossary helps to familiarise the language of medicinal chemistry. Boxes present in-depth material and explore how concepts are applied in practice. Key points summarise sections within chapters, providing a basis for revision, and questions at the end of chapters and on the accompanying Online Resource Centre allow the reader to test their understanding and develop molecular modelling skills.

## **Online Resource Centre**

The Online Resource Centre features:

For registered adopters of the book:

DT Answers to end-of-chapter questions

DT Figures from the book

DT Power Point slides

DT Test Bank questions

For students:

DT Multiple Choice Questions

DT Web articles

DT Molecular Modelling Exercises

DT 3D Rotatable structures
