Mathematics for the Digital Age and Programming in Python Maria Litvin and Gary Litvin

Mathematics for the Digital Age and Programming in Python is written in the same engaging not-for-dummies style as the Litvins' earlier books, but it is aimed at younger students. It offers a unique blend of mathematics and programming, designed to give students in introductory computer science courses an appreciation for the rigorous mathematics relevant to computing, as well as practical skills for writing programs.

The vision behind this book is that math and computer science should help each other. A programmer needs to be comfortable with abstractions, and that is precisely what math teaches. Computer science reciprocates by providing models and hands-on exercises that help clarify and illustrate more abstract math. Most importantly, both teach "precision thinking" an important means of solving problems that call for exact solutions.

Python was chosen because it is a popular commercial programming language that is well-supported, easy to get started with, and free. Python has many powerful features intended for software professionals, but it also has a convenient subset accessible to beginners.

Some students may choose to study AP Computer Science in high school, or major in CS in college. Others may decide to go into math, science, law, art, social sciences, or humanities. Regardless of your goals, *Mathematics for the Digital Age and Programming in Python* will help you gain a better understanding of the computerized world around you.

From reader reviews:

Judith Duncan:

Book is written, printed, or illustrated for everything. You can learn everything you want by a reserve. Book has a different type. To be sure that book is important matter to bring us around the world. Beside that you can your reading talent was fluently. A reserve Mathematics for the Digital Age and Programming in Python will make you to always be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that will open or reading a new book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you looking for best book or ideal book with you?

Michelle Wilson:

Now a day people that Living in the era just where everything reachable by talk with the internet and the resources inside it can be true or not involve people to be aware of each details they get. How many people to be smart in having any information nowadays? Of course the answer is reading a book. Reading a book can help individuals out of this uncertainty Information especially this Mathematics for the Digital Age and Programming in Python book because book offers you rich info and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it as you know.

Cynthia Briscoe:

Hey guys, do you desires to finds a new book to learn? May be the book with the concept Mathematics for the Digital Age and Programming in Python suitable to you? The particular book was written by popular writer in this era. Often the book untitled Mathematics for the Digital Age and Programming in Python is the one of several books that will everyone read now. This book was inspired many men and women in the world. When you read this e-book you will enter the new age that you ever know before. The author explained their strategy in the simple way, and so all of people can easily to be aware of the core of this book. This book will give you a lot of information about this world now. In order to see the represented of the world with this book.

Kerstin Torres:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you may have it in e-book means, more simple and reachable. This particular Mathematics for the Digital Age and Programming in Python can give you a lot of friends because by you checking out this one book you have factor that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This reserve offer you information that perhaps your friend doesn't learn, by knowing more than different make you to be great people. So , why hesitate? We should have Mathematics for the Digital Age and Programming in Python.
