Numerical Methods and Optimization in Finance

Manfred Gilli, Dietmar Maringer, Enrico Schumann

Numerical Methods and Optimization in Finance Manfred Gilli, Dietmar Maringer, Enrico Schumann

This book describes computational finance tools. It covers fundamental numerical analysis and computational techniques, such as option pricing, and gives special attention to simulation and optimization. Many chapters are organized as case studies around portfolio insurance and risk estimation problems. In particular, several chapters explain optimization heuristics and how to use them for portfolio selection and in calibration of estimation and option pricing models. Such practical examples allow readers to learn the steps for solving specific problems and apply these steps to others. At the same time, the applications are relevant enough to make the book a useful reference. Matlab and R sample code is provided in the text and can be downloaded from the book's website.

- Shows ways to build and implement tools that help test ideas
- Focuses on the application of heuristics; standard methods receive limited attention
- Presents as separate chapters problems from portfolio optimization, estimation of econometric models, and calibration of option pricing models

From reader reviews:

Andrea Winburn:

Book is to be different for every grade. Book for children right up until adult are different content. As you may know that book is very important for all of us. The book Numerical Methods and Optimization in Finance ended up being making you to know about other know-how and of course you can take more information. It is very advantages for you. The guide Numerical Methods and Optimization in Finance is not only giving you much more new information but also to become your friend when you truly feel bored. You can spend your own spend time to read your guide. Try to make relationship with all the book Numerical Methods and Optimization in Finance. You never truly feel lose out for everything if you read some books.

William Sam:

Reading a publication tends to be new life style on this era globalization. With reading through you can get a lot of information that could give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. A lot of author can inspire their very own reader with their story as well as their experience. Not only situation that share in the textbooks. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on earth always try to improve their expertise in writing, they also doing some investigation before they write to the book. One of them is this Numerical Methods and Optimization in Finance.

Victor McDowell:

You may get this Numerical Methods and Optimization in Finance by check out the bookstore or Mall. Merely viewing or reviewing it can to be your solve difficulty if you get difficulties on your knowledge. Kinds of this publication are various. Not only by simply written or printed and also can you enjoy this book by simply e-book. In the modern era like now, you just looking from your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose proper ways for you.

Lola Kelly:

That book can make you to feel relax. This specific book Numerical Methods and Optimization in Finance was bright colored and of course has pictures around. As we know that book Numerical Methods and Optimization in Finance has many kinds or genre. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading which.
