Data Analysis Using Regression and Multilevel/Hierarchical Models

Andrew Gelman, Jennifer Hill

Data Analysis Using Regression and Multilevel/Hierarchical Models Andrew Gelman, Jennifer Hill
Data Analysis Using Regression and Multilevel/Hierarchical Models is a comprehensive manual for the applied researcher who wants to perform data analysis using linear and nonlinear regression and multilevel models. The book introduces a wide variety of models, whilst at the same time instructing the reader in how to fit these models using available software packages. The book illustrates the concepts by working through scores of real data examples that have arisen from the authors' own applied research, with programming codes provided for each one. Topics covered include causal inference, including regression, poststratification, matching, regression discontinuity, and instrumental variables, as well as multilevel logistic regression and missing-data imputation. Practical tips regarding building, fitting, and understanding are provided throughout. Author resource page: <http://www.stat.columbia.edu/~gelman/arm/>

From reader reviews:

Lewis Tuggle:

Do you among people who can't read pleasant if the sentence chained in the straightway, hold on guys that aren't like that. This Data Analysis Using Regression and Multilevel/Hierarchical Models book is readable by you who hate the straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer connected with Data Analysis Using Regression and Multilevel/Hierarchical Models content conveys objective easily to understand by most people. The printed and e-book are not different in the content material but it just different in the form of it. So , do you continue to thinking Data Analysis Using Regression and Multilevel/Hierarchical Models is not loveable to be your top collection reading book?

Joyce Burke:

Nowadays reading books be than want or need but also become a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The data you get based on what kind of book you read, if you want drive more knowledge just go with schooling books but if you want really feel happy read one using theme for entertaining including comic or novel. The Data Analysis Using Regression and Multilevel/Hierarchical Models is kind of reserve which is giving the reader capricious experience.

Regina Schubert:

Reading a reserve can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a book will give you a lot of new details. When you read a reserve you will get new information because book is one of a number of ways to share the information or their idea. Second, reading a book will make you more imaginative. When you studying a book especially hype book the author will bring you to definitely imagine the story how the figures do it anything. Third, you could share your knowledge to other people. When you read this Data Analysis Using Regression and Multilevel/Hierarchical Models, it is possible to tells your family, friends and soon about yours guide. Your knowledge can inspire the others, make them reading a e-book.

Carol Ramirez:

Often the book Data Analysis Using Regression and Multilevel/Hierarchical Models has a lot associated with on it. So when you read this book you can get a lot of help. The book was compiled by the very famous author. This articles author makes some research previous to write this book. This book very easy to read you can get the point easily after scanning this book.
