Microsoft System Center 2012 Orchestrator Cookbook Samuel Erskine, Andreas Baumgarten, Steven Beaumont

Simplify the automation of system administration with this information-packed cookbook. By creating powerful runbooks you can gain total control, and our recipes show you how to use System Center Orchestrator to do just that.

Overview

- Create powerful runbooks for the entire System Center 2012 product line
- Master System Center 2012 to create advanced runbooks
- Learn how to install System Center Orchestrator and make it secure and fault tolerant

In Detail

Microsoft System Center Orchestrator 2012 simplifies the process of automating systems administration tasks. Originally a third-party product named Opalis, which Microsoft acquired in 2009, Orchestrator provides a simplified way of building complex automation. System Center Orchestrator is a complete solution that goes beyond basic automation.

"Microsoft System Center 2012 Orchestrator Cookbook" will teach you how to plan, create and manage powerful runbooks to help you automate mission-critical and routine administration tasks.

In this practical Cookbook you will learn how to master System Center 2012 by creating runbooks to control and automate every feature possible. You will start by learning how to efficiently install and secure System Center Orchestrator.

You will then learn how to plan and create functional and fault-tolerant System Center runbooks to automate daily tasks and routine operations. Diving deep into runbooks, you will learn how to create powerful and practical runbooks for the entire System Center family of products.

Unleashing your inner control freak, you will then master System Center automation by creating IT Service Management process runbooks and advanced runbooks to help you control every feature imaginable of System Center. If you want to save time and energy automating mission critical tasks with System Center 2012 Orchestrator, then this book is for you!

What you will learn from this book

- Create runbooks for Active directory tasks and IT Service Management processes
- Design and create runbooks for System Center Configuration Manager, Operations Manager, and Virtual Machine Manager
- Secure System Center Orchestrator with SSL certificates
- Create branching, looping and child runbooks to completely master System Center 2012 Orchestrator
- Install and make System Center Orchestrator fault tolerant
- Manage and automate your datacentre with powerful runbooks
- Automate your System Center environment

Approach

This book is written in a practical, cookbook style with numerous chapters and recipes focusing on creating runbooks to automate mission-critical and everyday administration tasks.

Who this book is written for

"Microsoft System Center 2012 Orchestrator Cookbook" is for administrators who wish to simplify the process of automating system administration tasks. This book assumes that you have a basic knowledge of Windows Server 2008 Administration, Active Directory, Network Systems and Microsoft System Center technologies.

That book also makes your current vocabulary increase well. That makes it easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this specific Microsoft System Center 2012 Orchestrator Cookbook instantly.

Lynda Wright:

Information is provisions for people to get better life, information these days can get by anyone with everywhere. The information can be a expertise or any news even a huge concern. What people must be consider when those information which is inside former life are hard to be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Microsoft System Center 2012 Orchestrator Cookbook as your daily resource information.

Linda King:

Playing with family in a park, coming to see the coastal world or hanging out with good friends is thing that usually you have done when you have spare time, then why you don't try thing that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Microsoft System Center 2012 Orchestrator Cookbook, you are able to enjoy both. It is great combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout men. What? Still don't have it, oh come on its referred to as reading friends.

Lauren Smith:

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library or even make summary for some guide, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that reading is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Microsoft System Center 2012 Orchestrator Cookbook can make you

sense more interested to read.
