National Gang Threat Assessment 2011 - Emerging Trends Federal Bureau of Investigation

The gang estimates presented in the 2011 National Gang threat assessment (NGta) represents the collection of data provided by the National Drug intelligence Center (NDiC) – through the National Drug threat survey, Bureau of Prisons, state Correctional Facilities, and National Gang intelligence Center (NGiC) law enforcement partners. an overview of how these numbers were collected is described within the scope and methodology section of the NGta. the estimates were provided on a voluntary basis and may include estimates of gang members as well as gang associates. likewise, these estimates may not capture gang membership in jurisdictions that may have underreported or who declined to report. Based on these estimates, geospatial maps were prepared to visually display the reporting jurisdictions. the data used to calculate street gangs and outlaw motorcycle Gangs estimates nationwide in the report are derived primarily from NDiC's National Drug threat survey. these estimates do not affect the qualitative findings of the 2011 NGta and were used primarily to create the map's highlighting gang activity nationally. after further review of these estimates, the maps originally provided in 2011 NGta were revised to show state-level representation of gang activity per capita and by law enforcement officers. this maintains consistency with the 2009 NGta report's maps on gang activity.
