One small step for a man, one giant leap for music! The Beatles and the Race to the Moon were the DNA of the 1960's: Two adventurous threads continuously intertwined from 1960 to 1970. Into the Sky is "a scholarly book masquerading as fast-moving historical fiction" From "Flurry of Notes": "One of the best books I read last year was "Into the Sky with Diamonds" . . . [RG] has written a book that everyone with a love for the Beatles, the Race to the Moon, or the '60s must read . . . It's detailed but not boring, familiar but not stale. [RG] breathes new life and perspective to an entire decade in a joyful and enlightening way, and sheds new light and insight into a time that shook the world. I guarantee you'll wish both the book and the Beatles never stopped" From Amazon: "I totally enjoyed reading this book. I highly recommend it for both people who were around to experience the events that occurred in the 60's and for the younger generation who will enjoy learning about an era of history that has had a huge impact" "This is one of the most fascinating books I have read in over 20 years! . . . It is an absolute "MUST READ" for anyone interested in musical legend of the Beatles and the origins, failed attempts, and success of our Moon Mission"
