Handbook of Data-Based Decision Making in Education

Theodore Kowalski, Thomas J. Lasley

Handbook of Data-Based Decision Making in Education Theodore Kowalski, Thomas J. Lasley

Education has fought long and hard to gain acceptance as a profession and, since professionals by definition use data to shape the decisions they make, education has little choice but to continue moving in this direction. This 3-part handbook represents a major contribution to the literature of education. It is a unique compendium of the most original work currently available on how, when and why evidence should be used to ground practice. It is a comprehensive, cross-disciplinary, research-based, and practice-based resource that all educators can turn to as a guide to data-based decision making.

The *Handbook of Data-Based Decision Making in Education* is a must read for researchers who are just beginning to explore the scientifically based nature of educational practice. It is also appropriate for policy makers and practitioners who are confronted with young people who need to be in classrooms where "best practices" are the norm and not the exception.
