Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity Roger Wiens

In its eerie likeness to Earth, Mars has long captured our imaginations—both as a destination for humankind and as a possible home to extraterrestrial life. It is our twenty-first century New World; its explorers robots, shipped 350 million miles from Earth to uncover the distant planet's secrets.

Its most recent scout is Curiosity—a one-ton, Jeep-sized nuclear-powered space laboratory—which is now roving the Martian surface to determine whether the red planet has ever been physically capable of supporting life. In *Red Rover*, geochemist Roger Wiens, the principal investigator for the ChemCam laser instrument on the rover and veteran of numerous robotic NASA missions, tells the unlikely story of his involvement in sending sophisticated hardware into space, culminating in the Curiosity rover's amazing journey to Mars.

In so doing, Wiens paints the portrait of one of the most exciting scientific stories of our time: the new era of robotic space exploration. Starting with NASA's introduction of the Discovery Program in 1992, scrappier, more nimble missions became the order of the day, as manned missions were confined to Earth orbit, and behemoth projects went extinct. This strategic shift presented huge scientific opportunities, but tight budgets meant that success depended more than ever on creative engineering and human ingenuity. Beginning with the Genesis mission that launched his career, Wiens describes the competitive, DIY spirit of these robotic enterprises, from conception to construction, from launch to heart-stopping crashes and smooth landings.

An inspiring account of the real-life challenges of space exploration, *Red Rover* vividly narrates what goes into answering the question: is there life elsewhere in the universe?

Why they might be thought like that? Have you seeking best book or ideal book with you?

Cindy Martin:

The book Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a very important thing like a book Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity? Some of you have a different opinion about publication. But one aim this book can give many facts for us. It is absolutely appropriate. Right now, try to closer along with your book. Knowledge or data that you take for that, it is possible to give for each other; it is possible to share all of these. Book Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity has simple shape however, you know: it has great and large function for you. You can appearance the enormous world by start and read a reserve. So it is very wonderful.

Susanne Pineda:

This Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity book is just not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is usually information inside this guide incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. That Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity without we comprehend teach the one who reading through it become critical in thinking and analyzing. Don't become worry Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it in the lovely laptop even cell phone. This Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity having good arrangement in word along with layout, so you will not truly feel uninterested in reading.

Armida Shipman:

As we know that book is important thing to add our knowledge for everything. By a guide we can know everything you want. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year ended

up being exactly added. This e-book Red Rover: Inside the Story of Robotic Space Exploration, from Genesis to the Mars Rover Curiosity was filled concerning science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading a new book. If you know how big benefit from a book, you can feel enjoy to read a publication. In the modern era like today, many ways to get book that you just wanted.
