**Gauge/String Duality, Hot QCD and Heavy Ion Collisions** Professor Jorge Casalderrey-Solana, Professor Hong Liu, Professor David Mateos, Professor Krishna Rajagopal, Dr Urs Achim Wiedemann

Heavy ion collision experiments recreating the quark-gluon plasma that filled the microseconds-old universe have established that it is a nearly perfect liquid that flows with such minimal dissipation that it cannot be seen as made of particles. String theory provides a powerful toolbox for studying matter with such properties. This book provides a comprehensive introduction to gauge/string duality and its applications to the study of the thermal and transport properties of quark-gluon plasma, the dynamics of how it forms, the hydrodynamics of how it flows, and its response to probes including jets and quarkonium mesons. Calculations are discussed in the context of data from RHIC and LHC and results from finite temperature lattice QCD. The book is an ideal reference for students and researchers in string theory, quantum field theory, quantum many-body physics, heavy ion physics and lattice QCD.

**From reader reviews:**

**Percy Brown:**

Beside this particular Gauge/String Duality, Hot QCD and Heavy Ion Collisions in your phone, it could give you a way to get more close to the new knowledge or data. The information and the knowledge you might got here is fresh from the oven so don't become worry if you feel like an old people live in narrow commune. It is good thing to have Gauge/String Duality, Hot QCD and Heavy Ion Collisions because this book offers to you readable information. Do you oftentimes have book but you don't get what it's all about. Oh come on, that would not happen if you have this in your hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss that? Find this book and read it from at this point!

**Elmira McGraw:**

That reserve can make you to feel relax. That book Gauge/String Duality, Hot QCD and Heavy Ion Collisions was colourful and of course has pictures on there. As we know that book Gauge/String Duality, Hot QCD and Heavy Ion Collisions has many kinds or type. Start from kids until teens. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading this.

**Meagan Shaffer:**

What is your hobby? Have you heard which question when you got college students? We believe that that question was given by teacher on their students. Many kinds of hobby, All people has different hobby. And also you know that little person including reading or as reading become their hobby. You need to understand that reading is very important along with book as to be the point. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You will find good news or update about something by book. Many kinds of books that can you decide to try be your object. One of them is actually Gauge/String Duality, Hot QCD and Heavy Ion Collisions.

**Gordon Frederick:**

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from the book. Book is published or printed or illustrated from each source in which filled update of news. With this modern era like currently, many ways to get information are available for a person. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just seeking the Gauge/String Duality, Hot QCD and Heavy Ion Collisions when you desired it?
